

Sustainable Futures Project

In 2019 Northumberland County Council declared a climate emergency, pledging to achieve net zero carbon emissions by 2030. To achieve this goal and create a better future for all our children, we must act now!

To support Early Years education providers with the achievement of this goal, the Early Years Team offer a self-directed online course - the 'Sustainable Futures Project'. Here practitioners will learn about key climate issues and the actions they can take to reduce their environmental impact and educate our youngest children to live more sustainably.

This training is available to all schools, settings and childminders signed up to the Early Years SLA and can be accessed via the training platform within your [School Readiness Passport account](#).
